

Tortoise North American Energy Corp.

December 2010

TYN
LISTED
NYSE

We invest primarily in equity securities of Master Limited Partnerships (MLPs), including oil and gas exploitation, energy infrastructure and energy shipping companies.

Our investment goal is to provide our stockholders with a high level of total return with an emphasis on current distributions.

TYN vs. a Direct MLP Investment

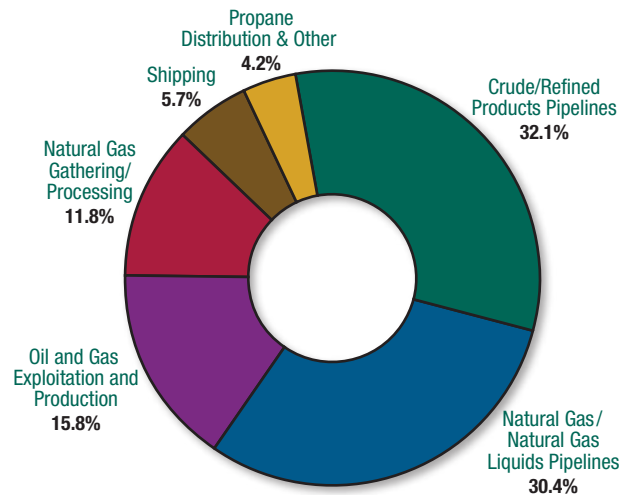

- Designed to provide an efficient alternative to investing in a portfolio of MLPs. A direct investment in the TYN fund offers the opportunity to receive an attractive distribution return with a historically low correlation to returns on stocks and bonds.
- Provides one Form 1099 per stockholder at the end of the year, rather than multiple K-1s and potential state filings for individual partnership investments.

MLP Characteristics

- MLPs are limited partnerships traded on the NYSE, NASDAQ and NYSE Alternext U.S. (formerly AMEX) public exchanges.
- MLPs are traditionally high cash flow businesses that pay out a majority of that cash to investors.
- Energy infrastructure MLPs are engaged in the transportation, storage and processing of crude oil, natural gas and refined products from production points to the end users.
- Rather than own price sensitive commodities, energy infrastructure companies typically own the storage, processing and transportation assets that are critical to the U.S. economy.
- Because their cash flows are based on volumes processed, stored or transported, energy infrastructure MLPs generally grow with the economy, population and project development and through acquisitions.
- Pipeline companies generally have minimal commodity price exposure and produce steady cash flows.

Allocation of Portfolio Assets*

(as of 8/31/10)

* Percentages based on total investment portfolio.

Disclaimer

Past performance is no guarantee of future results. Total return and market value will fluctuate so that shares, when sold, may be worth more or less than their original cost. Performance is for the stated time period only. Due to market volatility, current performance may be lower or higher than the figures shown.

Shares of closed-end funds frequently trade at a market price that is below their net asset value. Leverage creates risks which may adversely affect return, including the likelihood of greater volatility of net asset value and market price of common shares, and fluctuations in distribution rates on any preferred shares.

This data is provided for information only and is not intended for trading purposes. Closed-end funds, unlike open-end funds, are not continuously offered. After the initial public offering, shares are sold on the open market through a stock exchange. You should consider the investment objective, risks, charges and expenses of the fund carefully before investing. For this and other important information, please refer to the closed-end fund prospectus and read it carefully before investing. For additional information call Tortoise Capital Advisors, L.L.C., the fund adviser, at (866) 362-9331.

This fact sheet shall not constitute an offer to sell or a solicitation of an offer to buy, nor shall there be any sale of the securities in any state or jurisdiction in which such offer or sale is not permitted.
